

WHAT IS CLAIMED IS:

1. A pet stroller comprising:
  - a) a frame comprising;
    - i) a bottom section,
    - ii) a tray disposed on said bottom section,
    - iii) a handle disposed on said frame,
    - iv) a plurality of wheels rotatably secured to said frame; and
  - b) an enclosure comprising;
    - i) an enclosure frame forming a bottom section of said enclosure, an outer section of said enclosure, and a plurality of end sections of said enclosure, said enclosure frame comprising a plurality of semicircular hoop portions and a plurality of crossbars;
    - ii) a flexible netting material secured to said enclosure frame and covering said outer section of said enclosure;
    - iii) a padded material covering the bottom section of said enclosure;

- iv) at least one door releasably secured to  
at least one of said plurality of end  
sections of said enclosure; and
- v) a handle mounted to said enclosure for  
carrying said enclosure.

wherein said enclosure is mounted in said frame by  
placing said enclosure on said tray.

2. The pet stroller according to claim 1, wherein said  
frame comprises a plurality of side rails secured to said  
bottom section and a plurality of rear rails secured to said  
bottom section.

3. The pet stroller according to claim 2, wherein said  
plurality of side rails and said plurality of rear rails are  
comprised of metal tubing.

4. The pet stroller according to claim 1, wherein said  
frame is collapsible.

5. The pet stroller according to claim 1, wherein said

flexible material is secured to said enclosure frame with adhesive, rivets or binding.

6. The pet stroller according to claim 1, wherein said netting material comprises fish netting.

7. The pet stroller according to claim 1, wherein said netting material is secured to said enclosure frame by rope or string which is wrapped through a hole in said netting material and around said enclosure frame.

8. The pet stroller according to claim 1, further comprising a durable, water resistant material disposed on a portion of said outer section of said enclosure.

9. The pet stroller according to claim 1, wherein the durable water resistant material covers one of the end section of the enclosure.

10. The pet enclosure according to claim 9, further comprising a window cut in the end section that contains the water resistant material.

11. The pet enclosure according to claim 9, further comprising a pocket located in said end section containing the water resistant material.

12. The pet stroller according to claim 8, wherein said durable water-resistant material disposed on a portion of said outer section of said enclosure covers approximately one half of the length of said enclosure.

13. The pet stroller according to claim 1, wherein said enclosure is collapsible.

14. The pet stroller according to claim 1, wherein each of said plurality of wheels is comprised of rubber.

15. The pet stroller according to claim 1, said wheels are removable.

16. The pet stroller according to claim 1, wherein said plurality of wheels comprises four wheels.

17. The pet enclosure according to claim 1, further comprising a brake to stop rotation of said plurality of wheels.

18. The pet stroller according to claim 1, wherein said enclosure frame is constructed from a strong weather-proof material selected from the group consisting of aluminum, steel and heavy plastic.

19. The pet stroller according to claim 1, wherein said door is releasably secured to at least one of said plurality of end sections of said enclosure by a zipper.
